

AI-POWERED REFRIGERATION FOR A SMARTER FUTURE

Bengaluru | Vijayawada | Coimbatore | Vancouver |
Auckland | USA | UAE
solutions@chillec.com | www.chillec.com

Revolutionizing Commercial Refrigeration

AI-driven
efficiency

Lower energy
costs

Sustainable
cooling solutions

Real-time performance
monitoring

Enhanced food safety
& compliance

Smarter. Greener. Reliable.

The Challenge

40%

Energy inefficiency is a big
challenge in refrigeration.

Lack of real-time system
monitoring

30%

Leakage problems reduce
performance and cause
issues.

Skilled technician shortage

20%

Lack of data makes
decision-making harder.

Inconsistent temperature
control affecting product
quality

10%

CO2 emissions harm the
environment.

Regulatory compliance
challenges

This highlights the need for a robust AI-powered refrigeration system to tackle these inefficiencies effectively.

Our Solutions

“AI, IoT & Cloud-powered cooling for efficiency & sustainability”

Automatic Leak Detection (ALD)	Prevent failures & reduce losses
AI-Powered Predictive Maintenance	Optimize system uptime
Live Monitoring & Analytics	Data-driven performance insights
360 Enterprise Insight	Gain complete visibility into system health
Smart Demand Management	Adjust cooling loads in real time
Proactive Fault Detection	Identify compressor failures before they occur
Automated Compliance & Reporting	Continuous logging for regulatory compliance
IoT & Smart Sensor Integration	Wireless sensors & anomaly detection for risk mitigation
Energy Savings	Reduce power consumption by 30%
Efficiency Improvement	Enhance refrigeration performance by 25%
CO2 Reduction	Lower carbon footprint by 40%

Chillec Solutions ensures a smarter, greener, and more sustainable refrigeration system for businesses worldwide.

Industries We Serve

**Supermarkets | Dairy | Pharmaceuticals | Food Storage Logistics |
Cold Chain Logistics | Restaurants | Warehouses**

Client Benefits

- Lower operational costs
- Enhanced system reliability
- Compliance with sustainability goals
- ROI up to 40% in 6-8 months
- Smart decision-making with real-time insights
- Reduced downtime & maintenance costs
- Improved refrigeration lifespan
- Instant alerts for temperature fluctuations or rule violations
- Cloud data storage for historical analysis & reporting

Technology-Driven. Performance-Focused.
Future-Ready.

Why Chillec?

Industry leader in AI-powered refrigeration

Trusted by global businesses

Sustainable & cost-effective solutions

Cutting-edge AI & IoT-driven automation

Data-driven insights for optimized performance

Proactive solutions for leak prevention & maintenance

Mobile-friendly dashboard for easy remote access

Experience the future of refrigeration with Chillec
